

### UST\*CMS (Campus Management System)

- ☐ ☐ *Achieve Excellence*
- ☐ ☐ *Improve Services*
- ☐ ☐ *Better Accountability*

Whether a private college or a government funded institution, both share the same goal to provide students with quality education by optimal utilization of available resources. Higher education providers around the world operate in an increasingly competitive market. Information Technology is one of the key competitive advantages that education providers harness.

Managing an institution of higher education requires more than just simply processing admissions and collecting fees. It requires to effectively managing students, faculty and staff as well as track donations and grants. UST's Management System is the complete solution to support the fundamental college requirements of any educational institution. It incorporates an extensive range of activities essential to organization. It provides a single source of data repository for streamlining college business processes and reporting purposes.

UST's Campus Management System connects data, systems and people - integrates and automates student, faculty and administrative information, material management and finance allowing real-time access to all campus activities.

CMS is a powerful Campus Management System, integrating all key processes, transactions

and academic rules of the institution, helping to deliver efficient and effective information. It offers all the functionality and flexibility that leading institutions today require. In today's demanding environment there is ever-increasing need of meeting goals while increasing the flexibility to stimulate innovation and growth and this is what CMS provides.

### Summary of Features

It is a comprehensive college management system developed from the ground up to fulfilling the needs of independent institutions (colleges/Universities) as they guide their students to success. This integrated information management system connects daily operations in the Campus environment ranging from Admissions and Registration to Finance, Faculty, Medical, Material, Library and R&D. This reduces data error and ensures that information is always up-to-date throughout the Campus.

- It provides a single source of data repository for streamlining your business processes and reporting purposes.
- It has a simple user interface and is intuitive. This ensures that the users spend less time in learning the system and hence, increase their productivity.
- Efficient security features provide data privacy and maintains data integrity.
- You can send email messages and notices to an individual or department.
- Enables easy modifications, easy collaboration over the internet and offers complete life cycle management for your business processes.
- Supports your institution's daily operations by eliminating duplicate data entry, sharing the most up-to-date information, maintaining a detailed history of essential records. It has provision for dynamic report preparation.

Each module has been categorized by user type with password for accessing different modules. There are six types of users like System Administrator, Student, Staff, Inventory, Accountant and Librarian. System Administrator can access all module and can design own report for his requirement. Rest users can access only their own module and are not authorized to edit data.

### Benefits of UST\*CMS
