

UST provides business software, IT services and solutions to business and government.

SOFTWARE

As ERP and Business Intelligence specialists, UST offers an expanded portfolio of SAP solutions for government, education, utilities and private industry. As a SAP Channel Partner, UST is an authorized VAR for SAP All In One ERP software and SAP Business Objects business intelligence software.

UST has also developed some of its own software products. UST CMS (Campus Management System) and ECS (Examination Control System) solutions are available for Educational segment (Universities, Colleges and Schools) for customers only in India.

UST has developed a few complementary products for SAP customers. Examples are Barcode/RFID Integration Software for SAP which can be used by Automotive/Discrete Manufacturing Companies and the RRT (Rates Rollover Tool) Software for Higher Education Customers who are using SAP SLCM (Student Life Cycle Management) product.

SERVICES

We offer a full suite of Information Technology services and solutions including but not limited to

ERP (Enterprise Resource Planning) Implementation, Project Management, System Consulting, EAI (Enterprise Application Integration), Application Development, Migration & Re-Engineering, Business Process Management, Data Warehousing, Data Management, Business Intelligence, Application Maintenance, Networking and Support. UST is fully capable of handling any work volume small, medium and large since our business model is laid on a scalable infrastructure driven by the latest technology, quality people and recognized standard processes.

As a SAP Service Partner UST provides turnkey solutions and complete implementation life cycle support.

SOLUTIONS

One of the special things we do at UST is to provide the very best SAP implementation, consulting and support. We have extensive technical and functional expertise in SAP with competencies in many business domains like Government, K12 School Districts, Higher Education, Manufacturing, Automotive, Utilities, Retail, and Banking.

Universal System Technologies takes pride in having an impeccable record of completing all its projects successfully whether it involved T&M (Time and Materials) based consulting engagements or full scale turnkey implementations which spanned and encapsulated the entire software development process from the stages of requirement definition, systems design, application development, to systems implementation and maintenance. We have more than eleven years of proven track record of successfully delivering innovative business and technology services to numerous satisfied clients in business, government and industry.

UST has developed pre-configured, rapid deployment SAP ERP solutions for the following Industries based on SAP All In One software:

- Manufacturing/Automotiv
- Public Sector Government
- Higher Education
- K12 School Districts
- Utilities
